iCARE - Healthcare open and inclusive for all

iCARE aims to remove barriers to healthcare and social services for vulnerable groups, including elderly people, persons with disabilities, children, and citizens with chronic conditions or high-risk health profiles. The project addresses shared challenges across the Programme Area, such as rural isolation, low digital health literacy, limited availability of health e-services, and existing inequalities in access to primary care. Key deliverables include: Launching telemedicine and electronic health record systems; Acquiring mobility aids and electric vehicles for homecare; Piloting healthcare and social e-services; Conducting training workshops and seminars for healthcare professionals.
